INSTALLATION INSTRUCTIONS

Step 16: Wiring

• This step will cross over into the installation of other components you are installing in conjunction with the switch panel, such as nitrous controller, bottle heater, purge etc. Using the diagrams that came with those components route the wiring.

****Note:** The diagram to the left is a basic system diagram with a WOT Switch. To view a larger diagram, turn to the last page of these instructions, however you should be using a nitrous controller that incorporates a window safety switch with TPS activation.

Step 17:

Wipe the areas where the double-sided tape will attach with alcohol wipes. Peel the red backing off the double-sided tape and place it on the flange of the switch panel. Place the panel in position and firmly press the edges down.

Step 18:

Using a 10mm socket, reinstall the four bolts at the front of the console.

IMPORTANT: All appropriate safety equipment (gloves, tools etc.) must be used during the installation of this product(s). Nitro Dave's LLC accepts NO responsibility for injuries resulting in the installation of any product(s). Nitrous oxide is for off-road use only.
